Gimbal Introduction

U30T is a pinpoint-precision professional 3-axis gimbal which features high stability, small size, light weight and low power consumption. The 3-axis gimbal based on FOC motor control technology, adopts pinpoint-precision encoder in each motor.

The speed of U30T gimbal is adjustable, LOW speed mode is used for large zoom range, the control will be more accurate; Fast speed mode is used for small zooming range, which makes the gimbal control sensitive and quick. Also the one-key to center function will allow the gimbal return to initial position automatically and rapidly.

U30T supports PWM, S.BUS and serial command control, suitable for close range remote control or remote data command control.

# Object Tracking Function

1. Function description

   Build-in normalization, cross-correlation and tracking algorithm, combining with object missing recapture algorithm, achieve stable track of the target.

   Support custom characters of user OSD, adaptive gate, cross cursor, tracking information display.

2. Tracking performance

   1) Update rate of deviation pixel 50Hz
   2) Output delay of deviation pixel <10ms
   3) Minimum object contrast 5%
   4) The minimal signal-to-noise ratio (SNR) 4
   5) Minimum object size 16*16 pixel
   6) Maximum object size 160*160 pixel
   7) Tracking speed 32 pixel/frame
   8) The mean square root values of pulse noise in the object position<0.5 pixel
   9) Object memory time 100 framesl

GPS Information Display and Serial Port Control Wiring Diagram
To use the serial port function, please use the jumper cap to connect RX1 and RX2, TX1 and TX2.

External serial port TX connect with TX3. External serial port RX connect with RX3. External serial port GND connect with GND of wiring box.

Note: The signals in the black square are all TTL serial ports. Do not connect 5V and GND to serial data Interface!

The output of date radio stations (TTL 3.3 V) directly controls the gimbal and camera movements, in which the gimbal actions include:

1, Yaw control and angle output, pitch control and angle output, speed setting, angle setting, stop, return to Home;

2, camera actions include: zooming, focusing, start record, stop record, taking photos, record / photo Switch, zoom times information output, etc;

3, when there is no respond on the command from the control box, you need to enter the enquiry command to obtain the status of camera gimbal;

4, serial port baud rate 115200, 8-bit data bit, 1 stop bit, no check bit, HEX.

For specific protocols, please contact us for technical support.
