Viewpro

How to change IP address of Viewpro gimbal?

Use the serial port(same serial port for controlling the gimbal):

Hex, 48bytes,

Frame head: 7e 7e 44 00 00 87, IP address is : 4 bytes follow head

Last byte is checksum byte = sum of all bytes MOD 256.

Restart the gimbal after change the IP to validate the new IP address.

For example:

- IP: 192.168.0.2

7e 7e 44 00 00 87 c0 a8 00 02 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 00 31
